Virtual Machines (local development/testing), Photoshop/Fireworks, Device emulators (Xcode, Browser emulation), Chrome Dev Tools/Firebug (debugging, development, testing). Drupal CMS, WordPress CMS, Gemini/Jira (ticket and sprint management tools). Mac and PC platforms.

EXPERIENCE

Hearst Corporation – New York

Front-end Developer/Producer

August, 2014 - present

Maintained and built websites using HTML 4/5, CSS 2/3, LESS CSS, JavaScript/Jquery with some Smarty/PHP. Using Hearst Newspapers' custom CMS to format and publish a wide range of responsive content onto mobile devices and desktop browsers. Working in an Agile method (Agile used daily) to produce quick and regular releases adding new features and fixing bugs. Worked in a large distributed team via scrums/sprints and team-communication tools. (Jira, HipChat/IM).

- Built the front-end components and helped plan, produce and test the SSO/single-sign-on system for the HoustonChronicle market websites (using Janrain). Reviewed additional SSO providers for other projects.
- Maintained the front-end styles, scripts, and markup for several large websites on multiple platforms (mobile and desktop) including third-party products and content.
- Worked with Design and UI/UX to achieve their goals, and to refactor designs and wireframes to meet real-world requirements as solutions are developed.
- Regular release cycles achieved through daily scrums and sprints (Agile).

Penton Media Inc. – New York

Technical Producer

2007 – August, 2014

Built and maintained the Pisces primary CMS for Penton's 80+ magazine websites using Drupal. Built websites and content for Penton as well as expanded platform components for social media, community experiences, and expert networks. Maintained a central code-base and CSS framework for fast and efficient deployments using Agile methodologies. Tracked tasks from the planning and development stages into the release and post-deployment process. Used strict QA and testing strategies in tune with regular deployment schedules.

- Created Adaptive/Responsive sites using HTML 4/5 and CSS 2/3 with a "Mobile First" strategy.
- Built a custom CSS framework to manage many sites on one central codebase (CSS 2/3, SASS/LESS preprocessors).
- Semantic and accessible code, code reviews and regular testing cycles built into every project.
- Worked with Design to achieve better UI/UX for all user experiences across many sites (Live prototyping, Interactive wireframes).
- Helped convert print-focused magazines to a digital strategy to improve revenue at Penton.

Prism B2B – New York
Tech Producer/Producer
2004 - 2007

Built magazine websites and performed total redesigns for 120+ magazines using HTML 4/5, CSS 2/3, Javascript and JQuery. Helped produce and build a custom WordPress application called “Ask the Experts”. Managed the “Help Desk” for magazine websites and ticketed issues. Supported Penton’s editorial staff in producing web content and deploying third-party materials including micro-sites and special promotions.

- Managed company-wide website “Help Desk” to support Prism’s online products.
- Built the “Ask the Experts” product in WordPress, converting it into an “Expert Community” tool that sold very well in the Agriculture and Trades sectors of Prism’s B2B Magazines.
- Built micro-sites and special promotions as well as optimizing and deploying third-party widgets and content.
- Newsletter production

Freelance – New York/Washington D.C.
Producer/Web Developer/Sound Designer
2002 – 2010
